Government working with government.

# Fortress is changing the world of secure communications contracting

The term "secure communications" has a new meaning today. Processing and protecting your high-level, classified data, voice, video and other communications is a top priority. With the business partnership of GovWorks/PITSC, you gain a reliable partner for contracting to protect your critical infrastructure. Securing your information is as easy as picking up the telephone. Just call us for Fortress, the unique secure communications pre-competed IDIQ contract vehicle that's ready to meet your mission critical demands.

## Fortress services include:

1. Turnkey solutions under each contract that deliver a large variety of products including:
  - Project development plans
  - Project implementation support
  - Systems design and development
  - Systems testing and evaluation
  - Technical engineering support
2. Responsive solutions that work with an agency's current technology needs and infrastructure.
3. A comprehensive selection of already-in-place contracts with the best vendors in the industry:
  - SAIC
  - Booz, Allen & Hamilton, Inc.
  - Lockheed Martin
  - Telos Corporation
  - Northrop Grumman California Microwave Systems
  - CommPower
  - Open System Sciences
  - Computer & Hi-Tech Management, Inc.
4. Knowledgeable experts who understand military communications needs and the Defense Messaging System.
5. No more "Use it or Lose it" with your government funding.
